Severity and Findings	Test description
⌄ ⚠ **Alert** - Fix to unblock (34)	
Fix to unblock	
Blocked app /_by_plabel_/system_ext/app/uceShimService/uceShimService.apk	This build contains pre-installed "com.qualcomm.qti.uceShimService" at /_by_plabel_/system_ext/app/uceShimService/uceShimService.apk which has been signed by a certificate that is known to be compromised and should be replaced. If you believe this finding is incorrect please reach out to your TAM and provide details that help us to validate inaccuracies and improve detection.
Blocked app /system/priv-app/TeleService/TeleService.apk	This build contains pre-installed "com.android.phone" at /system/priv-app/TeleService/TeleService.apk which has been signed by a certificate that is known to be compromised and should be replaced. If you believe this finding is incorrect please reach out to your TAM and provide details that help us to validate inaccuracies and improve detection.
	This build contains pre-installed "com.qualcomm.qti.modemtestmode" at /_by_plabel_/system_ext/app/ModemTestMode/ModemTestMode.apk which has been signed by a certificate that is known to be compromised and should be replaced.

	If you believe this finding is incorrect please reach out to your TAM and provide details that help us to validate inaccuracies and improve detection.
Blocked app /system/priv-app/MediaProviderLegacy/MediaProviderLegacy.apk	This build contains pre-installed "com.android.providers.media" at /system/priv-app/MediaProviderLegacy/MediaProviderLegacy.apk which has been signed by a certificate that is known to be compromised and should be replaced. If you believe this finding is incorrect please reach out to your TAM and provide details that help us to validate inaccuracies and improve detection.
Blocked app /system/priv-app/DownloadProvider/DownloadProvider.apk	This build contains pre-installed "com.android.providers.downloads" at /system/priv-app/DownloadProvider/DownloadProvider.apk which has been signed by a certificate that is known to be compromised and should be replaced. If you believe this finding is incorrect please reach out to your TAM and provide details that help us to validate inaccuracies and improve detection.
Blocked app /_by_plabel_/system_ext/app/ConnectionManagerTestApp/ConnectionManagerTestApp.apk	This build contains pre-installed "com.qualcomm.qti.connmgr" at /_by_plabel_/system_ext/app/ConnectionManagerTestApp/ConnectionManagerTestApp.apk which has been signed by a certificate that is known to be compromised and should be replaced. If you believe this finding is incorrect please reach out to your TAM and provide details that help us to validate inaccuracies and improve detection.
Blocked app /system/framework/framework-res.apk	This build contains pre-installed "android" at /system/framework/framework-res.apk which has been signed by a certificate that is known to be compromised and should be replaced. If you believe this finding is incorrect please reach out to your TAM and provide details that help us to validate inaccuracies and improve detection.
Blocked app /system/priv-app/ONS/ONS.apk	This build contains pre-installed "com.android.ons" at /system/priv-app/ONS/ONS.apk which has been signed by a certificate that is known to be compromised and should be replaced. If you believe this finding is incorrect please reach out to your TAM and provide details that help us to validate inaccuracies and improve detection.
Blocked app /system/app/NfcNci/NfcNci.apk	This build contains pre-installed "com.android.nfc" at /system/app/NfcNci/NfcNci.apk which has been signed by a certificate that is known to be compromised and should be replaced. If you believe this finding is incorrect please reach out to your TAM and provide details that help us to validate inaccuracies and improve detection.
Blocked app /system/priv-app/ContactsProvider/ContactsProvider.apk	This build contains pre-installed "com.android.providers.contacts" at /system/priv-app/ContactsProvider/ContactsProvider.apk which has been signed by a certificate that is known to be compromised and should be replaced. If you believe this finding is incorrect please reach out to your TAM and provide details that help us to validate inaccuracies and improve detection.
Blocked app /system/priv-app/TelephonyProvider/TelephonyProvider.apk	This build contains pre-installed "com.android.providers.telephony" at /system/priv-app/TelephonyProvider/TelephonyProvider.apk which has been signed by a certificate that is known to be compromised and should be replaced. If you believe this finding is incorrect please reach out to your TAM and provide details that help us to validate inaccuracies and improve detection.

Blocked app /_by_plabel_/system_ext/app/datastatusnotification/datastatusnotification.apk	This build contains pre-installed "com.qti.qualcomm.datastatusnotification" at /_by_plabel_/system_ext/app/datastatusnotification/datastatusnotification.apk which has been signed by a certificate that is known to be compromised and should be replaced. If you believe this finding is incorrect please reach out to your TAM and provide details that help us to validate inaccuracies and improve detection.
Blocked app /system/priv-app/UserDictionaryProvider/UserDictionaryProvider.apk	This build contains pre-installed "com.android.providers.userdictionary" at /system/priv-app/UserDictionaryProvider/UserDictionaryProvider.apk which has been signed by a certificate that is known to be compromised and should be replaced. If you believe this finding is incorrect please reach out to your TAM and provide details that help us to validate inaccuracies and improve detection.
Blocked app /system/priv-app/Shell/Shell.apk	This build contains pre-installed "com.android.shell" at /system/priv-app/Shell/Shell.apk which has been signed by a certificate that is known to be compromised and should be replaced. It is also using a shared user id that can have higher privileges. If you believe this finding is incorrect please reach out to your TAM and provide details that help us to validate inaccuracies and improve detection.
Blocked app /system/app/Stk/Stk.apk	This build contains pre-installed "com.android.stk" at /system/app/Stk/Stk.apk which has been signed by a certificate that is known to be compromised and should be replaced. If you believe this finding is incorrect please reach out to your TAM and provide details that help us to validate inaccuracies and improve detection.
Blocked app /_by_plabel_/system_ext/priv-app/dpmserviceapp/dpmserviceapp.apk	This build contains pre-installed "com.qti.dpmserviceapp" at /_by_plabel_/system_ext/priv-app/dpmserviceapp/dpmserviceapp.apk which has been signed by a certificate that is known to be compromised and should be replaced. If you believe this finding is incorrect please reach out to your TAM and provide details that help us to validate inaccuracies and improve detection.
Blocked app /_by_plabel_/system_ext/priv-app/SystemUI/SystemUI.apk	This build contains pre-installed "com.android.systemui" at /_by_plabel_/system_ext/priv-app/SystemUI/SystemUI.apk which has been signed by a certificate that is known to be compromised and should be replaced. If you believe this finding is incorrect please reach out to your TAM and provide details that help us to validate inaccuracies and improve detection.
Blocked app /system/priv-app/CalendarProvider/CalendarProvider.apk	This build contains pre-installed "com.android.providers.calendar" at /system/priv-app/CalendarProvider/CalendarProvider.apk which has been signed by a certificate that is known to be compromised and should be replaced. If you believe this finding is incorrect please reach out to your TAM and provide details that help us to validate inaccuracies and improve detection.
Blocked app /system/priv-app/MmsService/MmsService.apk	This build contains pre-installed "com.android.mms.service" at /system/priv-app/MmsService/MmsService.apk which has been signed by a certificate that is known to be compromised and should be replaced. If you believe this finding is incorrect please reach out to your TAM and provide details that help us to validate inaccuracies and improve detection.

Blocked app /system/priv-app/DownloadProviderUi/DownloadProviderUi.apk	This build contains pre-installed "com.android.providers.downloads.ui" at /system/priv-app/DownloadProviderUi/DownloadProviderUi.apk which has been signed by a certificate that is known to be compromised and should be replaced. If you believe this finding is incorrect please reach out to your TAM and provide details that help us to validate inaccuracies and improve detection.
Blocked app /_by_plabel_/system_ext/app/ImsDataChannelService/ImsDataChannelService.apk	This build contains pre-installed "vendor.qti.imsdatachannel" at /_by_plabel_/system_ext/app/ImsDataChannelService/ImsDataChannelService.apk which has been signed by a certificate that is known to be compromised and should be replaced. If you believe this finding is incorrect please reach out to your TAM and provide details that help us to validate inaccuracies and improve detection.
Blocked app /_by_plabel_/system_ext/app/DynamicDDSService/DynamicDDSService.apk	This build contains pre-installed "com.qualcomm.qti.dynamicddsservice" at /_by_plabel_/system_ext/app/DynamicDDSService/DynamicDDSService.apk which has been signed by a certificate that is known to be compromised and should be replaced. If you believe this finding is incorrect please reach out to your TAM and provide details that help us to validate inaccuracies and improve detection.
Blocked app /_by_plabel_/system_ext/app/PresenceApp/PresenceApp.apk	This build contains pre-installed "com.qualcomm.qti.PresenceApp" at /_by_plabel_/system_ext/app/PresenceApp/PresenceApp.apk which has been signed by a certificate that is known to be compromised and should be replaced. If you believe this finding is incorrect please reach out to your TAM and provide details that help us to validate inaccuracies and improve detection.
Blocked app /_by_plabel_/system_ext/app/ImsRcsService/ImsRcsService.apk	This build contains pre-installed "vendor.qti.imsrcs" at /_by_plabel_/system_ext/app/ImsRcsService/ImsRcsService.apk which has been signed by a certificate that is known to be compromised and should be replaced. If you believe this finding is incorrect please reach out to your TAM and provide details that help us to validate inaccuracies and improve detection.
Blocked app /_by_plabel_/system_ext/app/DeviceInfo/DeviceInfo.apk	This build contains pre-installed "com.qti.qualcomm.deviceinfo" at /_by_plabel_/system_ext/app/DeviceInfo/DeviceInfo.apk which has been signed by a certificate that is known to be compromised and should be replaced. If you believe this finding is incorrect please reach out to your TAM and provide details that help us to validate inaccuracies and improve detection.
Blocked app /system/priv-app/BlockedNumberProvider/BlockedNumberProvider.apk	This build contains pre-installed "com.android.providers.blockednumber" at /system/priv-app/BlockedNumberProvider/BlockedNumberProvider.apk which has been signed by a certificate that is known to be compromised and should be replaced. If you believe this finding is incorrect please reach out to your TAM and provide details that help us to validate inaccuracies and improve detection.
Blocked app /_by_plabel_/system_ext/app/atfwd/atfwd.apk	This build contains pre-installed "com.qualcomm.atfwd" at /_by_plabel_/system_ext/app/atfwd/atfwd.apk which has been signed by a certificate that is known to be compromised and should be replaced. If you believe this finding is incorrect please reach out to your TAM and provide details that help us to validate inaccuracies and improve detection.

Blocked app /system/priv-app/CallLogBackup/CallLogBackup.apk	This build contains pre-installed "com.android.calllogbackup" at /system/priv-app/CallLogBackup/CallLogBackup.apk which has been signed by a certificate that is known to be compromised and should be replaced. If you believe this finding is incorrect please reach out to your TAM and provide details that help us to validate inaccuracies and improve detection.
Blocked app /_by_plabel_/system_ext/priv-app/DCTestApp/DCTestApp.apk	This build contains pre-installed "com.qualcomm.qti.dctestapp" at /_by_plabel_/system_ext/priv-app/DCTestApp/DCTestApp.apk which has been signed by a certificate that is known to be compromised and should be replaced. If you believe this finding is incorrect please reach out to your TAM and provide details that help us to validate inaccuracies and improve detection.
Blocked app /system/priv-app/SoundPicker/SoundPicker.apk	This build contains pre-installed "com.android.soundpicker" at /system/priv-app/SoundPicker/SoundPicker.apk which has been signed by a certificate that is known to be compromised and should be replaced. If you believe this finding is incorrect please reach out to your TAM and provide details that help us to validate inaccuracies and improve detection.
Blocked app /system/priv-app/MtpService/MtpService.apk	This build contains pre-installed "com.android.mtp" at /system/priv-app/MtpService/MtpService.apk which has been signed by a certificate that is known to be compromised and should be replaced. If you believe this finding is incorrect please reach out to your TAM and provide details that help us to validate inaccuracies and improve detection.
Blocked app /system/app/Bluetooth/Bluetooth.apk	This build contains pre-installed "com.android.bluetooth" at /system/app/Bluetooth/Bluetooth.apk which has been signed by a certificate that is known to be compromised and should be replaced. If you believe this finding is incorrect please reach out to your TAM and provide details that help us to validate inaccuracies and improve detection.
CVE-2024-31319	BTS has determined that a required security patch for CVE-2024-31319 (https://nvd.nist.gov/vuln/detail/CVE-2024-31319) corresponding to Android Security Bulletin 2024-06-01 (https://source.android.com/security/bulletin/2024-06-01) is not present in this build. Partners must ensure they are protected against all CVEs associated with the declared Security Patch Level on their device. The vulnerable code was found in the following file(s): /system/framework/services.jar/classes2.dex More information is available at https://support.google.com/androidpartners_security/answer/9061450
Fix to unblock - *Based on the product EDI. If EDI changed upload reports to confirm applicability.*	
CVE-2024-0039	BTS has determined that a required security patch for CVE-2024-0039 (https://nvd.nist.gov/vuln/detail/CVE-2024-0039) corresponding to Android Security Bulletin 2024-03-01 (https://source.android.com/security/bulletin/2024-03-01) is not present in this build. Partners must ensure they are protected against all CVEs associated with the declared Security Patch Level on their device. The vulnerable code was found in the following file(s): /_by_plabel_/system_ext/lib64/libbluetooth_qti.so More information is available at https://support.google.com/androidpartners_security/answer/9061450
